EXPERIENCE

Exelledia Quality Consulting, Kerala (Remote)

Mar 2024 - Present

Software Engineer (Back-end Developer)

- Designed and developed important **sub-modules end-to-end**
- Developed and scheduled **Cron jobs** for automating recurring backend tasks such as data processing, notifications and system updates.
- Implemented new features across existing modules based on client requirements
- Implemented data **import/export** functionalities, including **Excel-based bulk uploads** and generation of **Excel, Word and PDF reports** to improve data management efficiency.
- Developed and maintained **REST APIs** using Laravel.
- Basic hands-on with **AWS** services including **EC2** management, **IAM** access control for deployments and access management
- Provided first-level support for application environments, including **log monitoring, debugging** and **application stability**.

Exelledia Quality Consulting, Qatar

Dec 2024

Jr. Software Engineer (Onsite Assignment)

- Collaborated with onsite **L2/L3 teams** to analyse and resolve production issues within defined **SLAs**.
- Conducted **root-cause analysis (RCA)** for recurring issues and implemented corrective actions.
- Enhanced backend performance by optimizing **SQL queries** and restructuring **API logic**.
- Supported **UAT** by addressing client issues, validating fixes, and guiding users through new functionalities.
- Monitored system behaviour and supported production environment stability.
- Documented issue resolutions, **RCA reports** and deployment steps.

EDUCATION

Bachelor of Science: Computer Technology

2020 - 2023

KG College of Arts and Science, Coimbatore

CERTIFICATION & UPSKILLING
